

Family Wealth Advisors Council

Fact Sheet

Mission

The mission of the Family Wealth Advisors Council (FWAC) is to provide a means for like-minded practitioners of financial planning and investment portfolio management to regularly come together for the purposes of learning and of sharing skills, talent and experiences, studying various agreed-upon issues of the day, and exploring better ways of managing their practices and providing a high level of personal service to their clients.

History

Founded in 1981, the Family Wealth Advisors Council is a national network of independent, fee-only wealth management firms that collectively manage over \$3 billion in assets. The firms in the FWAC share a common belief that our clients come first in all of our dealings. In a world where many large brokerage firms and major banks consistently look for ways to sell their customers high cost products that they may not need, Family Wealth advisors will only provide advice that meets a higher standard of ethics on behalf of our clients. An important distinction between Family Wealth advisors and many other advisors is that we are held to a higher fiduciary standard. We sell no financial products, have no hidden agendas and are always “on the same side of the table” as our clients..
